12 Minutes for Lunch.

That is the average time spent in a large city restaurant by three thousand people. It takes three hours to digest a fresh egg soft boiled; three hours to digest a boiled apple dumpling; three hours to digest a fresh roast beef. In fact, three hours is about the time required to digest the average twelve minute lunch. The object of the busy lunch is to let the busy man get back to his office work. But when the brain is active, the stomach is inactive for lack of necessary blood. The natural consequence is indigestion, and indigestion opens the door to many diseases.

Indigestion is cured by the use of Dr. Pierce's Golden Medical Discovery, which cures diseases of the stomach and other organs of digestion and nutrition, and enables the perfect digestion and assimilation of food.

"It is with heartfelt gratitude that I send this testimonial which I wish you to publish with my name and address," writes Mr. Willis Benjamin, of Washington, Orange Co., N. V. "I had stomach trouble from childhood and suffered with it more or less as I grew up. At the age of 26 I was broken down with dyspepsia. My suffering was terrible. Could not eat without distress. Could only eat a few certain things and was not able to work half the time. Every thing I tried only gave me temporary relief. My wife finally persuaded me to try Dr. Pierce's Golden Medical Discovery and Pleasant Pellets. I took six bottles of the 'Golden Medical Discovery' and two bottles of the 'Pleasant Pellets.' I then felt so well that I stopped taking medicine. Several months have passed and I can do the hardest kind of work, can eat anything that is set before me and enjoy it. I am 27 years old and this is the first time I have ever been well."

Free. Dr. Pierce's Common Sense Medical Adviser in paper covers is sent free on receipt of 21 one-cent stamps to pay expense of mailing only, or 31 stamps for cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

TO FIGHT TUBERCULOSIS.

A dispatch from Paris says that during the last six months French philanthropy, especially in that city, has been concentrated in efforts to combat tuberculosis, which has assumed the proportions of a national peril. Public and private subscriptions have poured forth with unexampled liberality. One Parisian paper alone, the "Figaro," has raised over \$800,000 toward the establishment of tuberculosis sanatoriums after the German model, which Dr. Brouardel and the French delegates to the tuberculosis congress so enthusiastically commended. But on Wednesday the philanthropic public received a shock that came with the suddenness of a bomb from the blue, for Dr. Albert Robin, of the French Academy of Science, in a lecture delivered at the Sorbonne before an audience composed of scientists and of prominent men and women of Parisian society, announced that that has so far been accomplished in the great fight against tuberculosis is in vain, and that medical science and philanthropy have started on altogether the wrong tack. Dr. Robin does not hesitate to assert, and his position is supported by data which seemed irrefutable to such high authorities as Brouardel, Grancher and Landouzy, of the Paris Faculty of Medicine, who were present at the lecture, that tuberculosis, when once firmly established in the system, is practically incurable. Dr. Robin's figures prove that of thirty-six tuberculosis patients that leave the sanatorium ten relapse after six months and ten more after a year, and that only five out of thirty-six are saved. The only efficacious method of fighting tuberculosis, according to Dr. Robin, is prevention. The discoveries just made by Dr. Robin and his colleague, Maurice Binet, enable the stage of predisposition to tuberculosis to be determined with mathematical accuracy, two infallible tests being the excess of respiratory consumption and daily organic demineralization of tuberculosis that all efforts should be directed, the absolute remedy or prevention being easily attained by the air cure, by abstention from alcohol and by complete mental and physical rest. Dr. Robin maintains that the sanatoriums, toward which millions have been uselessly expended, are from a financial point of view impracticable, and therapeutically are simply chimerical. Dr. Robin supports his argument on the financial head by pointing out that, supposing only one hundred thousand beds were provided for the half million persons suffering from tuberculosis in France, and each bed costs \$1,000 for initial endowment, we have at once \$100,000,000 needed at the very outset, without counting incidental expenses.

CIRCULAR LETTER FROM MITCHELL.

President Mitchell of the United Mine Workers of America last night issued the following circular letter to all local unions in the anthracite district: Philadelphia, Pa., Jan. 12, 1903. To the Officers and Members of Local Unions of the U. M. W. of R. in the anthracite region. Gentlemen: You are no doubt aware that a serious coal famine exists in all the eastern and seaboard cities, due to the shortage of the anthracite coal supply. The situation has reached an acute stage, and has resulted in great suffering and hardship to the poor of the cities, whose earnings are insufficient to enable them to pay the excessive prices now being charged for fuel, and it is subjecting the general public to great inconvenience. To relieve the situation and alleviate as far as possible the suffering now being endured, it is the duty of every one connected with the production of coal. With this end in view, we are prompted to address this communication to all members of our union and request that they co-operate with the management of the mines in an effort to increase the production of coal. The gravity of the situation is such as to require that every mine worker shall exert himself and use every means at his command to this end. Upon reading this communication in the columns of the daily papers, local unions should hold meetings and devise means whereby by the daily output of the mines may be increased. These efforts should be continued until the weather moderates and the great necessity for fuel shall have passed.

The circular letter is signed by Mitchell and the presidents of the anthracite districts. MODEL OF SOLOMON'S TEMPLE.—It is stated that the reproduction of King Solomon's Temple on a large scale will be one of the attractions at the Louisiana Purchase Exposition. Working models, paintings and designs said to represent an outlay of \$150,000 have been inspected by members of the exposition management. From these models the temple will be reproduced as a counterpart of the famous original. The estimated cost is nearly \$500,000.
